

How Access Credit Union Achieved Unmatched Efficiency with SutiAP

“ Requisition creation time was reduced to just minutes. With real-time visibility throughout the process, the team was able to respond promptly at every stage, slashing the approval cycle time by 50%. ”

Manager
Financial Accounting

The Use of Manual Spreadsheets: How Did SutiAP Help?

With invoice volumes varying significantly between the off-season and peak season, Access Credit was finding it difficult to scale its operations as per the growing needs. Manually creating over 100 invoices per month deemed to be laborious and time-consuming. The other thing that the accounts payable department found problematic is matching invoices with purchase orders.

About Access Credit Union

Access Credit Union is the largest credit union in Manitoba, offering daily banking services, loans, mortgages, investment and business banking services. The firm is managing its daily operations manually and was seeking a solution to automate its accounts payable processes.

Manual accounts payable process was becoming increasingly fragile, and the lack of insight into spend analysis hampered the ability to project future budgeting and managing cashflow.

Automated invoice matching and verification allowed the AP team to concentrate on cash flow management. SutiAP enabled Access Credit to tackle cash flow challenges, streamline invoicing processes, and gain enhanced control and visibility over their financial operations.
