

SutiAP Helped Bedard Pharmacy Handle Accounts Payable with Greater Efficiency & Control

“I don't think about invoicing anymore – SutiAP handles all the bills and payables. We used to spend five hours a week making payments, and now, it's down to minutes. We could focus on core objectives, not just ensuring people were paid on time.”

-Sean Andrews
Director of Financial Operations
Bedard Pharmacy

The Most Pressing Issue

Bedard Pharmacy was relying on inefficient manual processes to manage its payables. Invoice and purchase order management was manual, the approval process got bogged down, and the company overpaid vendors. Bedard Pharmacy was looking for a robust system to proactively manage its accounts payable operations with an increasing number of global vendors and payments.

About Bedard Pharmacy

Bedard Pharmacy, Inc. is a retail company that produces pharmacy products. The company offers medical supplies, billing, prescription refills, MedBook packaging, and a range of home medical equipment and supplies. Bedard also provides pharmacy services to long-term care facilities.

Bedard tried a leading vendor, but it did not work for them due to its limitations, pricing structure, and customer service. We were impressed with Suti's ecosystem as the platform allowed us to manage accounts payable, expense reporting, and procurement processes from a centralized interface.

The Most Sought-after Solution

SutiAP offered automated invoice matching with purchase order and receipts. The solution improved payment efficiency while enhancing compliance and helped us to manage cashflow effectively. The best part is SutiAP's user-friendly interface, which doesn't require extensive training. With automation, Bedard was able to easily catch critical errors and eliminate manual work, allowing the team to refocus on strategic activities.

Key Highlights

- Streamlined all finance operations
- Automated invoice processing with 3-way matching mechanism
- Improved payment efficiency
- Self-service portal to facilitate supplier onboarding and communications
- Better transparency and financial visibility
- Automated real-time reporting, saving hours of AP team
