Why SutiProcure?

Automate Procurement Lifecycle

SutiProcure helps businesses manage procurement processes from creating requisitions to approvals, and contract creation to payments.

Intuitive User Interface

Intuitive interface makes it easy for users to navigate through the application and improves adoption rates.

Flexible Approval Workflows

Requisitions will be automatically routed to appropriate approvers based on the configured approval workflow .

Mobile Accessibility

Speed up the purchasing process – from requisition and PO creation to approvals with a fully-responsive, and intuitive mobile app.

Integration with ERP Systems

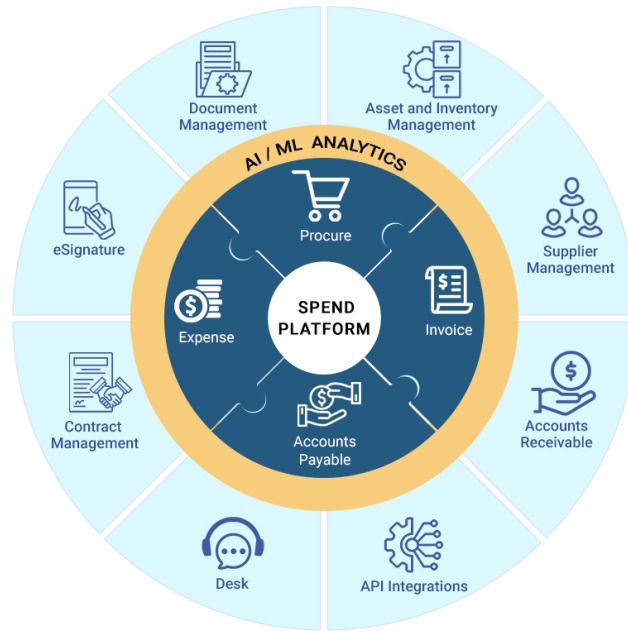

SutiProcure integrates with multiple ERP solutions such as QuickBooks, NetSuite, and more to allow seamless data transfer and eliminate data entry.

Extensive Customer Support

Our exceptional support service can help keep your enterprise operate effectively at all times, enabling you to keep pace with rising expectations.

SutiSoft Spend Platform

Features Summary

Purchase Requisitions

Transform the way you create requisitions with customized templates and approvers can sign-off requisitions right from their mobile devices.

Purchase Orders

Create POs on the negotiated terms and send them to vendors easily from a single interface.

Catalog

The catalog module provides employees with a seamless shopping experience by allowing them to purchase goods and services easily from partnered vendors with just a few clicks. The solution also empowers suppliers to update product details, pricing and add new products to the catalog at the earliest.

Invoice Management

SutiAP integration with SutiProcure allows you to automate invoice processes such as invoice validation, matching, and reconciliation. The solution features invoice matching – 2, 3, or N-way matching to validate invoices against contracts, POs, goods receipt notes, and more.

eSourcing

Identify, evaluate, and qualify new suppliers for your business with advanced eSourcing tools. Compare suppliers' bids and award contracts to the right suppliers who offer products and services at the most competitive prices.

Flexible Approval Workflows

Set up approval workflows for requisition, role, budget, department, and other criteria.

Vendor Management

All the vendor information can be found on a single, centralized repository, which makes it easy to evaluate and mitigate the risk.

Audit Trails

From requisition creation to delivery and final payment, SutiProcure maintains the full audit trail for each order, enabling you to monitor and control every transaction effectively.

Good Receipt Note

Manage, track and validate goods against delivery receipts to ensure that the delivered goods comply with the negotiated terms. The solution also allows you to initiate the Return Merchandise Authorization (RMA) process in case of any discrepancies.

Contracts

Integration with SutiContract allows you to create and track contracts easily. Advanced features such as contract authoring templates, version control, approval routing, and eSignature can help manage contracts effectively.

Budget Tracking and Control

Allocate budgets by department, business units and keep track of the company's spending with automated alerts and notifications. The solution provides complete insights into allocated budgets and helps make more informed decisions.

Reports & Analytics

SutiProcure provides a 360-degree view of the data to monitor spending activity and measure success across the enterprise. Custom reports can be generated and insights can help make informed decisions to improve the process efficiency.

Inventory Management

Manage stock in multiple warehouses using our cloud-based inventory solution. Track items within warehouses, manage shipments and have a centralized control over all your warehouses.

Self-service Vendor Portal

Self-service vendor portal enables vendors to registration themselves quickly without delays. Vendors can add their information and perform various activities on time without hassle.
